

With the 2024 AWA South Australian Award Gala theme of SCIENCE FICTION – The Future is Now, The AWA SA committee would again like to call on you to provide some light entertainment for the evening.

This year we have a couple of options where you and your organisation can take part which we're sure that with a bit of imagination we again will create something that is talked about for years to come across our industry.

Option #1

Industry Skit

A team or group performance where again in the line of our theme of Science Fiction, you tailor a short video that can be shown on the night. This can be anything, a dance, a music clip, an iconic movie scene, what ever you can come up with that will give the room a good giggle.

Video – (30-60 secs)

Option #2

Photo comp

Send in your Science Fiction photos either as a group or as an individual, and again totally of your choosing with the only stipulation being adhering to the theme.

Tech Advice: Quality of your presentation is key so please ensure good lighting and sound/audio is either overlaid after or outside noise sources are reduced.

Videos are also preferred to be filmed in Portrait mode if possible.

Please submit your one or two videos through to Laura Steffan by COB 31st of October 2024
